USER TESTIMONIALS

WHY USE A 2 -BLOWER SYSTEM WHEN YOU CAN USE ONE?

CATTLE

Levi Douglas, Texas

"The Hairstream blower is the most intriguing new product out. From my use of the Hairstream, I find it to be unparalleled in airflow capacity from a single motor blower and it pulls low enough amperage that you can plug two of them into a 30 amp breaker. The design of the blower is compact and allows for more space to be utilized in a show box. I feel that anybody who uses the Hairstream will find it to be a revolutionary product."

GOATS/LAMBS

Robin Walters,

www.barnonemeatgoats.com: "This blower cuts my blowing time down a lot. I can dry 5 grown bucks in the same time it takes me to dry 3 with the competitor's blower. I can also run 2 of these blowers on a 30 amp breaker— something you can't do with a standard blower. It also takes up less room and weighs less in the tack box."

Mike Harbour,

www.harbourlivestock.com: The Hairstream is the most powerful blower I have ever used. It really works great on dense haired goats and long fleeced lambs. I really like the square shape, it fits well in the tack compartment. The ultra light weight makes it great for carrying around at the shows. I recommend them to anyone who wants the latest and greatest blower around.

DOGS

**Donna Calabrese, Top GSD Handler/
Groomer**

"We had 4 big dryers at our stall at the national with 8 groomers. Everyone would argue over who got to use the Hairstream first. It really moves the water out of the coat!"

Mary Tripp, GSD Breeder/Groomer

"My drying time has been cut by 30%. With the lighter weight and more compact design, I can't think of more I could ask for."

Not Just Green on the Outside:

*Because the Hairstream Dryer
pulls fewer AMPs of electricity,
you get all the benefits of a
"Green" product!*

***Save drying time, save
money in repairs, and
save energy with
Hairstream!***
